Career Objective

Full-Stack Developer with 3+ years of experience in modern web technologies, including React, Next.js, Node.js, MongoDB and PostgreSQL. Seeking opportunities to build scalable applications, solve complex technical challenges and grow in cloud, DevOps and AI-driven software development.

Professional Experience

Back-end Developer

05/2022-Present

The Dot Red LTD.

Kamal Ataturk Avenue, Banani C/A, Dhaka - 1213, Bangladesh

Skills

- Back-end: Nodejs, **Express**, AWS(EC2, S3), Azure
- Database: MongoDB, PostgreSQL
- Operating-system: Linux, Windows
- Front-end: **Nextjs 14**, React, Redux, Redux-toolkit, **Tailwind CSS**, Ant Design, Javascript.

Project Experience

- Amazon Keyword Research Platform** {Node.js, Express.js, MongoDB, RestAPI} 2024-Present
 - Resolved timeout failures for bulk operations by implementing adaptive timeout middleware, enabling users to upload 150MB+ files without interruption
 - Created multi-stage workflow system tracking keyword lifecycle across 5 states, reducing data inconsistencies by 90%
 - Optimized database connection handling and implemented error recovery, improving application stability during peak usage
- Smart Supply Chain Intelligence System** {Node.js, Express.js, MongoDB, Socket.io} 2022-2023
 - Integrated Walmart Marketplace APIs with real-time order/inventory sync, OAuth 2.0 authentication, and automated daily processing of 100+ JSON files using cron job.
 - Developed month-by-month inventory accounting system reconciling 8 transaction categories with MongoDB aggregation pipeline for monthly balance sheet generation.
 - Built settlement reconciliation system parsing Walmart reports and matching transactions to orders with fulfillment fee calculations across 15+ transaction types.
- Nexus Commerce** {Node.js, Express.js, MongoDB, Twilio, Handlebars, REST API} 2026-Present
 - Built multi-warehouse supply chain module with real-time inventory visibility, automated workflows, and stock reconciliation audits.
 - Implemented RBAC with 2FA authentication and permission-based UI rendering for granular access control.
 - Built idempotent order endpoints with duplicate prevention for reliable transaction handling.

Academic Qualification

BA(Hons) in English

CGPA: 2.71

Bangladesh Islami University

2022-2025
